WORKSCOPE  
BRICK REPLACEMENT  
WALLACE TUNNEL

Furnish all labor, materials, (less face brick furnished by the State), equipment, tools, transportation and supplies required to remove and replace damaged face brick, at the George C. Wallace Tunnel (West ramp on the outside of the North ramp wall). The work shall be done as a lump sum. This work will be performed in a manner that will restore the structure to its original condition. All materials used shall be of the kind and quality consistent with the trade practice for such work and shall comply with all local codes. All labor used shall be well experienced in this type of work. All work to be performed during normal work hours Monday through Friday evening.

**NOTE: The Contractor will be required to work a full eight (8) hours each workday until repairs are completed. Contractor will respond and begin repairs within five (5) working days after notification.**

Work will not be permitted on the following holidays: Fourth of July, Labor Day, Thanksgiving Day, Christmas Day and New Years Day.

Usage is estimated at 3,000 pieces. These figures are estimates and in no way obligate the State to have this work performed.
